

Oracle BI to Cloud Migration Workshop and Assessment

Available 100% remotely using best business practices for remote engagement.

Apps Associates Data and Analytics practice is pleased to offer this workshop and assessment process to help you decide whether migrating Oracle BI to the Cloud is right for your organization and, if so, what is the best approach. On-premises Oracle BI platforms like Discoverer, Oracle Business Intelligence Enterprise Edition (OBIEE), Oracle BI Applications (OBIA) and Oracle Data Integrator (ODI) have added value to many organizations over the years. However, these platforms do not include the advanced capabilities, ease of use, reduced maintenance burden and lower TCO of Oracle's Cloud-based analytics offerings. They are also either out of support or nearing this milestone. Oftentimes on-premises Oracle BI platforms have many integration points, making it difficult to determine how best to migrate to the Cloud without significant disruption to the business.

Workshop Approach

This complimentary workshop and assessment process is conducted by Apps Associates over a series of meetings with key stakeholders and functional area management – typically spanning 2-3 weeks but can be shorter. To make the meetings most effective, we request that you perform about 2-3 hrs of pre-meeting preparation work and we provide guidance about what information should be collected.

Workshop Deliverables

- ✓ Gap Analysis (current state assessment vs future requirements)
- ✓ Cloud Technology Education
- ✓ Cloud Migration Options Analysis
- ✓ Total Cost of Ownership (current vs future)
- ✓ Cloud Migration Recommendation, Roadmap, Plan and Estimate

Workshop Objectives

The objectives of the workshop and assessment process are as follows:

Enable you to gain a clear understanding of your current Oracle BI environment and surrounding analytics infrastructure and integration points

Identify the internal and external requirements and market forces that will drive data and analytics for your organization in the future

Provide education on Oracle's latest Cloud-based Analytics offerings, upgrade processes and Cloud migration paths

Allow you to understand and evaluate all the options available for migrating Oracle BI to the Cloud and their related pros and cons

Provide a recommendation from Apps Associates on the best approach for migrating Oracle BI to the Cloud

Develop a Cloud Migration Roadmap, Plan and Estimate

Benefits

- Alignment of Oracle BI future plans with business strategies and goals
- Agreed consensus across key stakeholders and functional area management
- Detailed plan ready for execution

How to Get Started
