

Understanding Oracle Transaction Business Intelligence (OTBI) Features & Functionality Training 101

OTBI is a powerful real time reporting and analysis tool within Oracle Cloud Applications that can provide insight into transaction data that can be used to assist with decision making. It offers robust data visualization, and role-based dashboards that are available on mobile devices and support multiple languages. However, many customers struggle with leveraging this tool to its fullest capabilities – we can help!

Get Your Teams Comfortable with OTBI Tools & Reporting

We find that customers who are live on Oracle Cloud Applications are underutilizing the OTBI tool and are intimidated by diving into its features and functionality on their own. Apps has created a pre-packaged interactive training session to get your team familiar with and knowledgeable on core concepts within OTBI. Users will be hands-on, developing their own reports and dashboards. The training also includes topics around security, report folder structures, and scheduling of reports.

Training Designed With the User in Mind

Our comprehensive training is delivered in person or virtually over two days. We can accommodate up to 20 learners in each session.

This training is perfect for new and existing users of Oracle Cloud Applications across ERP, SCM, HCM, EPM. It can benefit subject matter experts, directors, CIO, and CTOs. Through demonstrations and hands-on exercises, users understand the basic features and functions of OTBI analysis development and reporting.

There is no preparation for organization or the user. We do the heavy lifting; your employees just need to show up ready to participate and learn.

What Will My Team Learn:

Our Subject Matter Experts will teach you how to convert your transactional data into intelligence for enriched decision-making.

Our 2-day training session users get comfortable with:

- Key Terminology and the OTBI Framework
- Features and OTBI Reporting Options in Oracle Cloud Applications
- Building Analysis Reports and creating multiple views
- Saving, and sharing your analysis or report with your business colleagues
- Creating and customizing easy-to-use dashboards in a drag-and-drop manner
- Understanding how to navigate around data structure available for reporting

Our training is fixed price at \$5,000 per two-day session. Our goal is to make sure you and your team understand the value of OTBI and how it can help your organization and you make your decisions for digital transformation.
