

## Apps Associates Implements a Comprehensive Reporting and Analytics Platform for FormFactor, Inc.

FormFactor, Inc. (NASDAQ: FORM) is a leading provider of essential test and measurement technologies along the full Integrated Circuit life cycle – from characterization, modeling, reliability, and design de-bug to qualification and production test. FormFactor has over 2300 employees and revenues over \$770 million. They have 23 service and repair centers, 13 sales offices and 10 design centers. They have offices in North America, Europe, and Asia.

### Business problem

FormFactor set out to improve its advanced analytics capabilities and leverage predictive insights with automation. Already possessing a strong analytics capability, FormFactor was looking to move even further up the Analytics Maturity Curve to increase efficiency, improve manufacturing processes, enhance the customer experience and empower end users.

### Solution

The FormFactor team envisioned a solution that involves aggregating and centralizing data from various sources into a well-structured, secure, and easily accessible repository. This data warehouse would serve as a single source of truth, ensuring data consistency and accuracy across the organization. The platform would provide the ability to absorb data from any source as well as support consumption of analytics from any tool. The team evaluated various different solutions available on the market and selected Autonomous Data Warehouse as a solution that best fit the environment.

The implementation combined pre-built accelerators offered by Apps Associates which allowed for quick data absorption from the existing EBS and EPBCS environment and proved to be a very effective strategy for increasing user adoption.

Apps Associates Analytics Accelerators allowed the team to focus on interpreting the data and organizing it into useful dashboards for consumption. The results delivered were 59 seeded reports, 12 customer reports, and 20+ custom sub reports/views to satisfy monthly/quarterly Balance Sheet and Income Statement requirements with drill to detail within 8 weeks.

### About Apps Associates

Apps Associates is a premier enterprise applications and technology advisor, counseling and executing across every stage of the enterprise transformation journey-not just the destination. For more than two decades, Apps Associates has closely collaborated with decision makers across nearly every industry, offering end-to-end integration, modernization, and cloud migration services. By helping to break down the silos within today's most complex business challenges, Apps Associates is unlocking solutions and efficiencies that scale into future opportunities.
