

Apps Associates' Oracle Manufacturing Capabilities

Partnering with Apps Associates' highly experienced team of Oracle Manufacturing Cloud technology experts can make for a seamless and effective transition to the Cloud. An Oracle partner since 2002, we have helped countless organizations innovate their business and anticipate future needs to improve operations.

Apps Associates' Cloud capabilities are established and far-reaching. Manufacturing and Automotive organizations need to be agile, resourceful and have insights into future decision making. From shop floors to marketplaces Apps helps manufacturers maximize productivity and improve collaboration across the value chain. The modern and current supply chain faces more disruption than ever before. It's a crowded marketplace, where operational speed and agility are now essential for meeting heightened customer expectations. Today's unpredictable world requires a future-proofed supply chain that leverages modern IT capabilities to meet changing demands.

Apps Associates' Oracle Manufacturing Cloud capabilities includes:

Understanding each organization's strategy is different. We help develop a plan that fits businesses' objectives and moves them on their journey towards digital transformation. We have many industry and product resources to help leverage modern capabilities including Workshops, Quick Start Accelerators and Pre-Built Reports.

Turn Manufacturing Pain Points into Improved Efficiency and Productivity with Oracle and Apps Associates:

Our areas of manufacturing expertise include:

Top down driven supply chain planning from Sales & Operations Planning, Demand Planning, Tactical Planning down to detailed Production Scheduling within factory and order promising to drive accurate ship dates on orders. This involves all the master data management setups, processes, and procedures with SCM and the corresponding setups in the supply chain planning applications within Oracle Cloud.

Addressing Supply Chain Planning in constrained manufacturing environments include unique requirements such as:

- Production Campaigns
- Moving Lines (Takt Driven Manufacturing)
- Attribute Driven Planning
- Job Shop and Repetitive Manufacturing
- Lot Driven Planning to Support the Complex Requirements of Industries Such as Pharmaceuticals.
- Addressing Material and Resource Capacity Constraints
- Alternate / Simultaneous Resources
- Forward / Backwards Scheduling (JIT / Prebuild)

Production Scheduling

- Core planning, scheduling features, constructs and constraints are challenges faced daily by manufacturers. Production scheduling makes these challenges easier by putting the power in the users hands by providing drag and drop functionality, what if scenarios, and attribute sequencing.

Quality

- Improve and ensure quality and consistency of your product and drive excellence throughout your supply chain.
- Flag operations, supplier quality issues and type along with workflow status

Apps Associates has the manufacturing and automotive industry knowledge and the platform wisdom to customize solutions to accelerate. Find out how Apps Associates can help your organization, learn more [here](#).

About Apps Associates

Apps Associates is a premier enterprise applications and technology advisor, counseling and executing across every stage of the enterprise transformation journey—not just the destination. For more than two decades, Apps Associates has closely collaborated with decision makers across nearly every industry, offering end-to-end integration, modernization, and cloud migration services. By helping to break down the silos within today's most complex business challenges, Apps Associates is unlocking solutions and efficiencies that scale into future opportunities.
