

# AppsAccelerate for Oracle SCM: Attribute-Based Planning for MTO

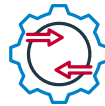

The **AppsAccelerate for Oracle SCM: Attribute-Based Planning for MTO** solution is designed to optimize supply chain operations by leveraging Oracle's powerful planning and execution tools to manage complex attribute-driven workflows. While the solution builds upon Oracle's native capabilities, it extends those functionalities to support Make-to-Order (MTO) processes, ensuring that specific product attributes are tracked and accounted for in planning and execution, leading to enhanced operational efficiency and accurate product delivery.

## Key Specifications

### Platform Compatibility

Optimized for Oracle SCM, ensuring seamless integration with your existing Oracle ecosystem.

### Flexible Integration

Supports API-based data exchange, leveraging Oracle Integration Cloud (OIC) to connect with other business systems.

### Custom Configuration

Customizable to align with your unique business requirements, supporting attribute-driven demand planning for MTO or complex product variants.

## Key Benefits

### 1. Efficiency & Automation:

**Attribute-Driven Planning:** Automates the supply planning process by incorporating product attributes, ensuring accurate planning and stock management based on specific client requirements.

**MTO Workflow Support:** Facilitates smooth Make-to-Order (MTO) processes, from sales order creation to final product delivery, accounting for unique product configurations.

### 2. Integration & Flexibility:

**Seamless Integration:** Extends Oracle SCM's standard functionalities with flexible configurations, incorporating attribute-based planning, inventory control, and product assembly tailored to specific attributes or variants.

**Customizable Supply Planning:** Enables the use of custom product attributes in supply planning, ensuring production and inventory are aligned with real-time production needs.

### 3. Cost Efficiency & Scalability:

**Optimized Inventory:** Reduces excess inventory by aligning production and stock levels with attribute-driven supply plans, minimizing waste by supporting lean operations and simultaneously maximizing product availability.

**Scalable:** Provides a flexible and scalable framework that grows with your business, adapting to evolving supply chain complexity.

## How It Works

### 1. Sales Order Integration:

Order Management automatically generates work orders from sales orders using Oracle SCM's back-to-back flow mechanism, accounting for key product attributes that drive production.

### 2. Attribute-Based Planning:

The solution extends this back to back flow based on specific product attributes, ensuring the right materials are available for each order while supporting complex MTO workflows.

### 3. Custom Configurations:

Tailored configurations ensure the solution meets your unique supply chain and business requirements, adapting Oracle's native capabilities to your needs.

## Frequently Asked Questions (FAQs)

### What problem does the Attribute-Based Planning solution address?

It resolves inefficiencies in managing supply and inventory for attribute-driven or Make-to-Order (MTO) products by leveraging Oracle's functionality and features to create a seamless, automated, and accurate solution within Oracle SCM.

### Can the solution integrate with non-Oracle systems?

Yes, it supports integration with external systems through Oracle Integration Cloud, enabling seamless data exchange.

### Is the solution customizable?

Absolutely. It offers extensive configuration options, including support for specific product attributes and MTO processes, to fit your unique supply chain needs and business processes.

Optimize your supply chain today with **AppsAccelerate for Oracle SCM: Attribute-Based Planning for MTO industries**.
