

# AppsAccelerate for Oracle SCM: Intercompany Optimization for Asia Deployments

## Enhancing Efficiency in Global Supply Chain Operations

The **AppsAccelerate for Oracle SCM: Intercompany Optimization** solution is crafted to streamline intercompany operations across Asia for U.S. manufacturers, especially in high tech and manufacturing sectors. This solution seamlessly integrates with Oracle SCM to automate financial orchestration flows, improve data visibility, and optimize resource allocation across complex global structures.

## Key Specifications

### Platform Compatibility

Optimized for Oracle SCM Cloud, ensuring seamless integration with your existing Oracle infrastructure across global and regional entities.

### Intercompany and Intracompany Flow Management

Configurable to manage intercompany and intracompany transactions, separating financial and physical transaction elements to meet the specific needs of diverse regional and legal requirements.

### Automated Financial Orchestration

Automates intercompany processes by defining business rules for financial orchestration across legal entities, with customization for tax structures in a global context.

## Key Benefits

### 1. Enhanced Visibility and Flow:

Achieve end-to-end visibility and control over intercompany flows, ensuring timely and cost-effective delivery of goods and services across Asia.

### 2. Optimized Efficiency:

Centralizes sourcing and order management, reducing implementation costs, improving supply chain speed, and supporting seamless flow across borders.

### 3. Adaptability for Complex Structures:

Enables agility in corporate reorganizations and acquisitions with easily adaptable financial orchestration flows that fit into any structural change.

### 4. Cost Savings and Compliance:

Streamlines tax modeling in global environments to reduce supply chain costs and maintain compliance without impacting the physical movement of goods.

## How It Works

### 1. Financial Orchestration with Oracle SCM:

The financial orchestration capabilities integrate with Oracle SCM to ensure continuous intercompany process flows across all levels, from order creation to fulfillment.

### 2. Automated Order and Inventory Management:

Automates and aligns order and inventory management processes, enhancing visibility and data accuracy for inventory levels and distribution paths.

### 3. Data Visualization and Access:

Equips users with accessible, real-time data visualization tools to make faster, informed decisions across regions.

## Frequently Asked Questions (FAQs)

### What challenges does Intercompany Optimization address?

This solution addresses the challenges of managing complex intercompany flows, from automating financial orchestration to improving data visibility across borders, essential for businesses expanding into Asia.

### Is the solution scalable for growing businesses?

Yes, designed with scalability in mind, this solution adapts to evolving production and transaction needs, supporting corporate expansions and structural changes.

### Can the solution be customized to meet different tax and compliance requirements?

Absolutely. The financial orchestration framework is highly customizable to accommodate diverse tax structures and compliance standards in a global environment.
