

AppsAccelerate for Healthcare: Fusion Data Intelligence (FDI)

Empowering Healthcare Organizations with Data-Driven Insights

Unlock the Power of Prebuilt Analytics with Oracle FDI

Healthcare providers face increasing pressure to enhance operational efficiency, optimize patient care, and streamline financial management. AppsAccelerate for Healthcare leverages Oracle's Fusion Data Intelligence (FDI), a robust analytics platform designed to deliver actionable insights through prebuilt dashboards, KPIs, and data pipelines.

With FDI, healthcare organizations gain real-time visibility into patient care, payer mix, and operational performance, all while leveraging Oracle's advanced analytics and machine learning capabilities.

Key Features

1. Prebuilt Content for Accelerated Insights

- **Packaged KPIs and Dashboards:** Over 250+ KPIs tailored to healthcare operations, finance, and workforce analytics.
- **Prebuilt Semantic Models:** Enable seamless integration with Oracle Fusion ERP, SCM, HCM, and CX.
- **Patient-Centered Analytics:** Gain visibility into patient census, admissions, demographics, and diagnoses.

2. Quick Start Implementation

- **Rapid Deployment:** Implement any module within 6-8 weeks for a fixed cost.
- **Seamless Integration:** Pre-configured pipelines connect to Oracle Fusion applications, providing out-of-the-box insights.
- **End-to-End Enablement:** Includes setup, data validation, go-live support, and training.

3. Enhance Your Analytics with EHR Data

- **Patient Census Reporting:** Analyze patient experience and volumes across departments
- **Revenue Cycle and Payer Mix Reporting:** Gain insights into billing performance and payer mix
- **Patient Encounters:** Understand patient engagement throughout the facility

4. Flexible Add-On Services

- **Custom KPIs and Dashboards:** Extend FDI with tailored metrics and analytics.
- **Managed Services:** Optimize and maintain analytics capabilities with Apps Associates' support.

Why Choose Apps Associates?

With decades of Oracle Cloud expertise and a specialized focus on healthcare, Apps Associates delivers tailored solutions that enable providers to unlock the power of their data and streamline operations. Our deep understanding of healthcare processes and data allows us to extend Oracle Fusion Data Intelligence (FDI) into a single, comprehensive analytics platform that integrates insights across financial, operational, administrative, and clinical data sources.

We help healthcare organizations:

✓ Improve Decision-Making:

Leverage AI and ML-powered insights for better operational and patient outcomes.

✓ Enhance Efficiency:

Streamline analytics deployment with prebuilt content and quick start implementation.

✓ Maximize ROI:

Sync analytics with Oracle Cloud release cycles to ensure continuous innovation and alignment with organizational goal.
