

# AppsAI by Apps Associates

## Intelligent Transformation Starts Here

Smarter delivery. Stronger outcomes. Powered by AI.

## Accelerate Oracle Cloud Success with AI-Enhanced Delivery

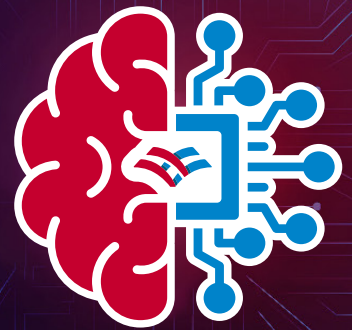

AppsAI by Apps Associates combines proprietary tools, Oracle AI expertise, and certified delivery teams to streamline implementations, reduce risk, and deliver smarter outcomes—faster. By applying AI throughout the delivery lifecycle, we help clients reduce cost, minimize disruption, and go-live with confidence.

Our next-gen approach integrates automation, analytics, and Oracle's latest AI (generative, predictive and agentic) capabilities into every implementation and managed service.

## Challenges We Solve

Modernizing with AI introduces real complexity. Common challenges include:

- **Siloed AI Projects & Unclear Use Cases** – Limited alignment reduces impact
- **No Strategy** – Lack of business focus lowers adoption and ROI
- **Poor Data Quality** – Incomplete or messy data undermines AI value
- **Limited Internal Expertise** – Teams lack time or trained talent to move confidently
- **Unstructured & Disconnected Data** – Valuable insights trapped in PDFs, emails, voice notes, and other non-tabular formats

## What We Deliver

### AI-Powered Implementation

- AI-assisted configuration and validation
- Automated data migration, cleansing, and mapping
- Intelligent testing and defect tracking
- Embedded change impact analysis and training insights

### Client-Facing Innovation

- Embedded AI features within Oracle Fusion Cloud (e.g., IDR, AI Assistants, Forecasting, HCM tools for recruiting, workforce planning, and employee self-service)
- Deployment of Oracle Agentic AI use cases to solve industry business problems
- Strategic advisory on responsible AI adoption and use-case prioritization
- Unstructured and multimodal data integration using Oracle's AI Services, enabling intelligence from voice, images, emails, and scanned documents

### AI-Driven Managed Services

- Proactive system monitoring with AI-generated alerts
- Predictive issue identification and ticket prevention
- Intelligent license optimization and utilization analysis
- Chat-based support through GenAI assistants

We also help clients go beyond Fusion Applications by tapping into data warehouses, data lakes, and previously inaccessible unstructured data. Using Oracle's PaaS offerings—such as OCI GenAI, AI Vector Search, and RAG (Retrieval-Augmented Generation)—we help operationalize intelligence across the enterprise.
