

# Amazon Redshift as a Governed Enterprise Data Platform for Analytics and AI

Apps Associates' Analytics Accelerators for Amazon Redshift

## Amazon Redshift: Scalable, Fully Managed Enterprise Data Platform

Amazon Redshift is an enterprise-grade data platform that enables organizations to bring together critical business data, manage it in a governed and secure manner, and deliver trusted insights at scale. As a fully managed cloud data platform, Redshift provides a reliable foundation for enterprise data while supporting analytics and AI initiatives across the organization.

However, building a production-ready data and analytics platform traditionally takes significant time and effort including building data pipelines, modeling data from complex Cloud ERP systems, and developing deep functional knowledge of source applications.

With Apps Associates' Analytics Accelerators for Amazon Redshift, organizations can bypass much of this foundational work and be up and running with answers to key business questions in weeks — not months. Our Accelerators provide pre-built ingestion, data models, and analytics that eliminate the need to design pipelines from scratch or rely on scarce Cloud ERP functional expertise, while delivering governed, scalable data the business can trust from day one.

## Functional Areas Covered

Our Amazon Redshift Analytics Accelerators deliver pre-built analytics across the following core business domains, allowing leaders to quickly understand performance and take action without navigating raw transactional data:

### Finance

General Ledger, Accounts Payable, Accounts Receivable, Fixed Assets, Projects

### Supply Chain

Order Management, Inventory, Fulfillment, Distribution

### Procurement

Purchase Requisitions, Purchase Orders, Purchase Receipts, Spend Analysis

### Human Capital Management

Workforce Profile, Turnover, Terminations, Performance, Talent Acquisition

Each functional area is designed to support enterprise reporting, cross-functional analysis, and executive decision-making from a common, governed data foundation.

Persona	Key Business Questions Answered
<b>Executive Leadership</b> (CFO, COO, CIO)	<ul style="list-style-type: none"><li>• How is the business performing versus plan across finance, operations, and workforce?</li><li>• What are the key drivers of revenue, margin, cash flow, and risk?</li><li>• Where should leadership focus attention based on current performance and trends?</li></ul>
<b>Finance Leadership</b>	<ul style="list-style-type: none"><li>• What is driving period-over-period variance and overall financial performance?</li><li>• Where are cash flow inefficiencies across AR, AP, and working capital?</li><li>• Are financial close, reconciliation, and compliance processes operating as expected?</li></ul>
<b>Operations &amp; Supply Chain Leadership</b>	<ul style="list-style-type: none"><li>• Where are inventory, fulfillment, or distribution issues impacting cost and service levels?</li><li>• How efficiently are orders flowing from order management through fulfillment?</li><li>• What operational bottlenecks are affecting revenue or customer satisfaction?</li></ul>
<b>People &amp; Delivery Leadership</b> (HR / PMO)	<ul style="list-style-type: none"><li>• What workforce and project trends are impacting productivity, cost, and outcomes?</li><li>• Where is the organization at risk due to turnover, capacity, or skill gaps?</li><li>• Are projects and initiatives delivering expected value relative to cost and effort?</li></ul>

## Built on Amazon Redshift. Designed for Rapid Business Value.

Apps Associates' Analytics Accelerators are built on Amazon Redshift to provide a scalable, governed enterprise data platform that supports analytics and AI-driven use cases.

Rather than starting with raw data and undefined requirements, our Accelerators deliver pre-built data models and analytics aligned to real business questions. This allows organizations to move quickly from data to insight while maintaining strong governance, security, and consistency.

Pre-built ingestion processes connect Amazon Redshift to leading enterprise source systems, including:

**Oracle Fusion Cloud  
Applications (ERP, SCM, HCM)**

**Oracle Enterprise Performance  
Management (EPM) Cloud**

**Oracle E-Business  
Suite (EBS)**

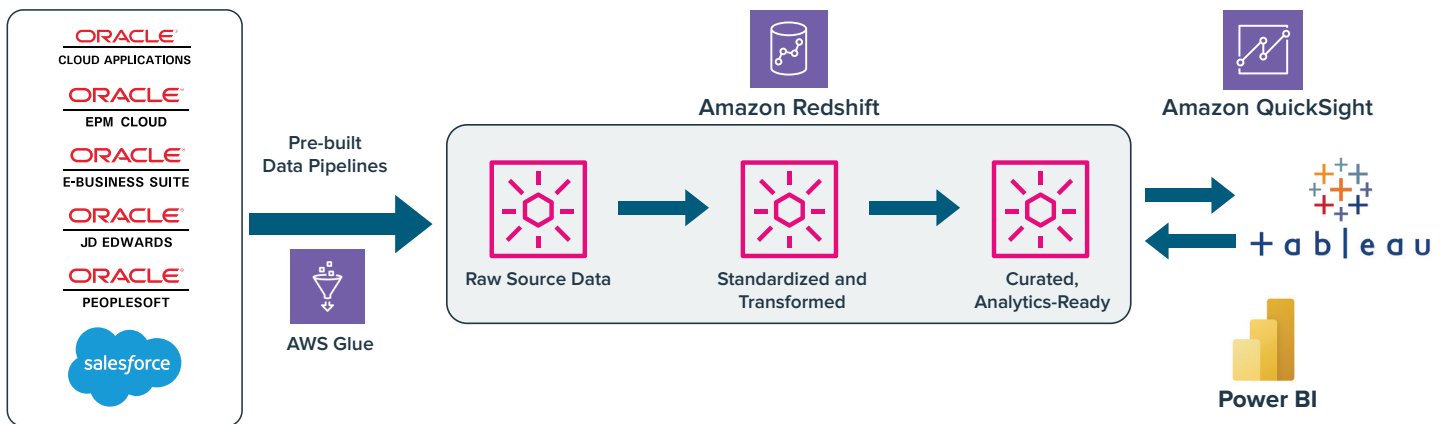

**Oracle JD Edwards (JDE)**

**Oracle PeopleSoft**

**Salesforce**

This approach dramatically reduces implementation time and risk, while ensuring the data foundation is ready to scale as business needs evolve.

Below is an architecture diagram for our Amazon Redshift Analytics Accelerators:

## Key Benefits:

- Get trusted answers to critical business questions in weeks, not months
- Avoid lengthy data extraction and modeling efforts from complex ERP systems
- Eliminate reliance on scarce ERP functional expertise
- Deliver governed, consistent analytics executives can trust
- Enable scalable self-service analytics across the enterprise
- Establish a strong foundation for future AI-driven initiatives

## Transform into a Data and AI-Driven Organization

With Apps Associates' Amazon Redshift Analytics Accelerators, organizations can unlock the value of their enterprise data faster and with less risk. Data becomes accessible, governed, and aligned to business outcomes — not trapped in operational systems or buried in spreadsheets.

Executives and managers gain timely, reliable insight into financial, operational, and workforce performance, enabling better decisions today while laying the groundwork for advanced analytics and AI initiatives tomorrow.
