

# Accelerate Your Oracle Data and AI Journey

Apps Associates' Oracle Analytics Accelerators

## Oracle Cloud: An Integrated Enterprise Platform for Data, Analytics, and AI

Oracle Cloud delivers an integrated, enterprise-grade platform for data, analytics, and AI. By orchestrating core services into a cohesive platform experience, Oracle enables organizations to move faster from data to insight—without the operational complexity that traditionally slows enterprise analytics and AI initiatives.

Oracle AI Data Platform sits at the center of this platform experience, acting as a unifying control plane and single console for data, analytics, and AI workloads. It brings together Oracle AI Lakehouse and Oracle Analytics Cloud (OAC) into a cohesive environment that simplifies data integration, governance, analytics, and AI at enterprise scale.

Apps Associates' Oracle Analytics Accelerators are built natively on Oracle AI Data Platform, Oracle AI Lakehouse, and Oracle Analytics Cloud. They are production-ready solutions—not templates—that enable organizations to go from raw Oracle application data to governed, analytics- and AI-ready insights in a matter of weeks.

Built on Oracle Analytics Cloud, the Accelerators are pre-configured to support natural language interaction with enterprise data, allowing executives and business users to ask questions in plain language and receive answers from trusted, governed semantic models—without needing technical expertise.

## Functional Areas Covered

Our Oracle Analytics Accelerators span the following functional domains:

### Finance

General Ledger,  
Accounts Payable,  
Accounts Receivable,  
Fixed Assets, Projects.

### Supply Chain

Order Management,  
Inventory, Fulfillment,  
Distribution.

### Procurement

Purchase Requisitions,  
Purchase Orders,  
Purchase Receipts,  
Spend Analysis.

### Human Capital Management

Workforce Profile,  
Turnover, Terminations,  
Performance, Talent  
Acquisition.

Each functional area is designed to support enterprise reporting, cross-functional analysis, and executive decision-making from a common, governed data foundation.

Persona	Key Business Questions Answered
Executive Leadership (CFO, COO, CIO)	<ul style="list-style-type: none"><li>• How is the business performing versus plan across finance, operations, and workforce?</li><li>• What are the key drivers of revenue, margin, cash flow, and risk?</li><li>• Where should leadership focus attention based on current performance and trends?</li></ul>
Finance Leadership	<ul style="list-style-type: none"><li>• What is driving period-over-period variance and overall financial performance?</li><li>• Where are cash flow inefficiencies across AR, AP, and working capital?</li><li>• Are financial close, reconciliation, and compliance processes operating as expected?</li></ul>
Operations & Supply Chain Leadership	<ul style="list-style-type: none"><li>• Where are inventory, fulfillment, or distribution issues impacting cost and service levels?</li><li>• How efficiently are orders flowing from order management through fulfillment?</li><li>• What operational bottlenecks are affecting revenue or customer satisfaction?</li></ul>
People & Delivery Leadership (HR / PMO)	<ul style="list-style-type: none"><li>• What workforce and project trends are impacting productivity, cost, and outcomes?</li><li>• Where is the organization at risk due to turnover, capacity, or skill gaps?</li><li>• Are projects and initiatives delivering expected value relative to cost and effort?</li></ul>

## Built on Oracle Cloud. Ready for AI.

Apps Associates’ Oracle Analytics Accelerators are built on Oracle AI Data Platform, Oracle AI Lakehouse, and Oracle Analytics Cloud (OAC) to deliver clean, governed, analytics- and AI-ready data. A layered data architecture separates ingestion, curated enterprise data, and analytics-optimized models—supporting strong governance, performance, and scalability.

Each functional area includes approximately 50 pre-built dashboards and reports in Oracle Analytics Cloud, built on curated semantic models. These models are pre-configured for natural language interaction, enabling executives and business users to ask questions in plain language and receive answers from trusted enterprise data.

Pre-built data pipelines extract, load, and transform data into Oracle AI Lakehouse from leading enterprise source systems, including:

Oracle Enterprise Performance Management (EPM) Cloud

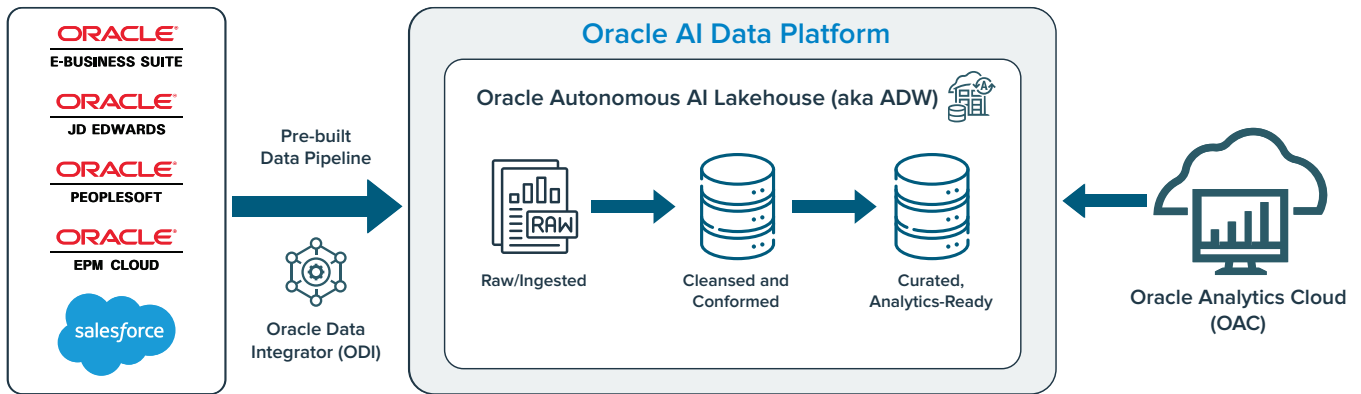

Oracle E-Business Suite (EBS)

Oracle JD Edwards (JDE)

Oracle PeopleSoft

Salesforce

Below is an architecture diagram for our Oracle Analytics Accelerators:

## Key Benefits:

- Production-ready analytics in weeks, not months
- Built natively on Oracle AI Data Platform, Oracle AI Lakehouse, and Oracle Analytics Cloud
- Pre-built ingestion from complex Oracle and third-party enterprise source systems
- Curated enterprise data models reduce reliance on deep application expertise
- Rapid, trusted visibility into critical business functions for executives and managers
- Natural language interaction with governed enterprise data through Oracle Analytics Cloud
- Secure, governed self-service analytics for business users
- Scalable foundation for advanced analytics and future AI-driven use cases.

## Transform into a Data and AI-Driven Organization

With Apps Associates' Oracle Analytics Accelerators, organizations can unlock the value of their enterprise data and deliver trusted insights to executives and managers in a matter of weeks. Data is no longer trapped in operational systems — it becomes accessible, governed, and ready for advanced analytics and AI. Executives and managers can ask questions in natural language, understand what is happening across the business, and take action based on timely, reliable insights.
