

# OneOracle: The Complete Cloud

## Powered by Apps Associates

Oracle Cloud is a unified platform that brings together enterprise applications, world-class infrastructure, advanced data platforms, and cutting-edge AI within a single cloud platform.

Apps Associates is purpose-built to deliver value across this unified OneOracle ecosystem — from strategy and implementation to Fusion applications, data and analytics, managed services, and AI-driven innovation.

This approach enables organizations to modernize faster, reduce complexity, and drive more value from their Oracle investment.

## The OneOracle Platform

Oracle Cloud uniquely combines modern enterprise applications with a fully integrated data, infrastructure, and AI stack — giving organizations everything they need to become AI-first and AI-mature.

### Cloud Applications

Oracle Fusion — ERP, HCM, SCM, and CX (including Fusion AI Agent Studio)

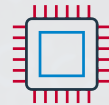

### Infrastructure

World-class compute, GPU, and networking on Oracle Cloud Infrastructure (OCI)

### Data Platform and Analytics

Oracle Cloud Database, AI Data Platform and Oracle Analytics Cloud

### AI Services

Generative AI, machine learning, vision, language, intelligent automation and AI agent development

## How Apps Associates Delivers Value Across OneOracle

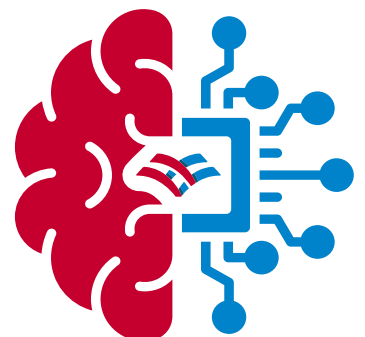

### End-to-End Fusion Coverage with AI Innovation

We implement, integrate, and manage the full Oracle Fusion suite across ERP, HCM, SCM, and CX — from initial deployment through ongoing optimization.

Our approach incorporates AI-enabled delivery and prebuilt AI agents developed in Oracle Fusion AI Agent Studio, helping accelerate time-to-value across common enterprise use cases.

### Apps Associates' Practices: Making Oracle Cloud More Than the Sum of Its Parts

Apps Associates brings dedicated expertise to every pillar of the OneOracle ecosystem — applications, infrastructure, data and analytics, and AI — delivering complete, integrated coverage from strategy through execution.

## Data, Analytics & AI — Across the Full OneOracle Spectrum

We implement and extend Oracle's Fusion AI Data Platform (FAIDP) and deliver custom and prebuilt analytics solutions built on Oracle AI Data Platform, Oracle AI Lakehouse, and Oracle Analytics Cloud.

The modern enterprise data estate spans structured, semi-structured, and unstructured data — from transactions to documents. We leverage Oracle AI Data Platform and OCI AI Services to bring this full estate under management, applying AI and advanced analytics to drive intelligent decision-making at enterprise scale.

## Infrastructure & Applications Under One Roof

We manage both OCI infrastructure and Fusion applications together — eliminating handoffs between vendors and reducing risk across the delivery lifecycle.

This unified model enables more efficient operations, stronger performance, and the agility to leverage AI and innovation as Oracle Cloud evolves.

## Strategy Through Managed Services

Growing your Oracle Cloud footprint shouldn't mean adding partners, managing handoffs, or repeatedly re-educating vendors on your business. Apps Associates provides everything from advisory and roadmap development through implementation, optimization, and long-term managed services — under one relationship.

Our practices are connected, our learnings are shared, and our managed services model is built on automation, continuous optimization, and AI-driven insights — so clients move faster, avoid AI sprawl, and extract more value from Oracle Cloud at every stage of the journey.

## Why Apps Associates

**We Know Your Business** — accumulated context and continuity across every stage of your Oracle journey

**Hands-On Expertise** — deep, practical experience across Oracle applications, data, infrastructure, and AI

**A True Partnership** — we invest in your success for the long term, not just the current engagement

**Faster Outcomes** — prebuilt solutions and proven accelerators that deliver value more quickly

**At the AI Edge** — consistently at the forefront of leveraging AI for real business value across the full Oracle ecosystem

## One Platform. One Partner

From infrastructure to AI, from data to Fusion — Apps Associates is uniquely positioned to deliver end-to-end value across the full OneOracle ecosystem.
